Project Documentation - Part A

Project Name: Agentic Document Automation System
Document ID: PROJ-DOC-001

Chapter 1: Introduction

The system lets users define document processing pipelines
through simple JSON configuration files.

Key Features:
- Template-based document generation
- Dynamic content insertion
- Advanced PDF manipulation
- Comprehensive audit logging

--- END OF PART A ---

Project Documentation - Part B

Project Name: Agentic Document Automation System
Document ID: PROJ-DOC-002

Chapter 2: Implementation

- python-docx fills Word templates and builds tables
- reportlab draws the watermark text
- pypdf merges pages and stamps the watermark onto each page

Chapter 3: Testing

Run main.py and compare the files in documents/ with the
expected results described in README.md.
